

I reopened all old quizzes, including the 3rd quarter. So if you missed any, please take this opportunity to complete them.

Please complete the Fluid Id sheet in canvas and email me a copy or picture. You will need access to a vehicle with an owners manual. Use the manual to fill in the specifications and the check the fluids and mechanicals and entire the Id information. You will not be able to check everything that I did in the demo without a load tester and hydrometer. Just do the best you can !
