## Residential Wiring ARTICLE / VIDEO REVIEW

Directions: Please read / watch the article / Blog and write a short paragraph detailing the main points and summarize the information

**Website:**

**Author/Director:**

**Wisconsin Energy Cooperative News.**

**What was the main idea?**

**The advancement in technology is better for energy, however we are running into financial problems.**

**Summary of article/video (minimum of a paragraph):**

We should try reducing the amount of energy we use, for the cost of it. Time-of-use rates are helpful because the cost of the energy depends on what time of day you use it at. With costly demand charges, we want to try reducing the amount of electricity we use at one time. However, unlike the rest of the problems, fixed monthly charges cost the same every month. We should try to adapt to balanced energy and electricity lifestyle.

**How do you see yourself applying the information you learned in this article/video in your own.**

I will try to reduce the amount of technology that I use.
