Instructions for Accessing Remote Learning Resources for AP Psychology

NOTE: updates and announcements for AP Psychology students will be posted to the course Canvas page and sent via Remind and ECASD e-mail (Message Center in Skyward)
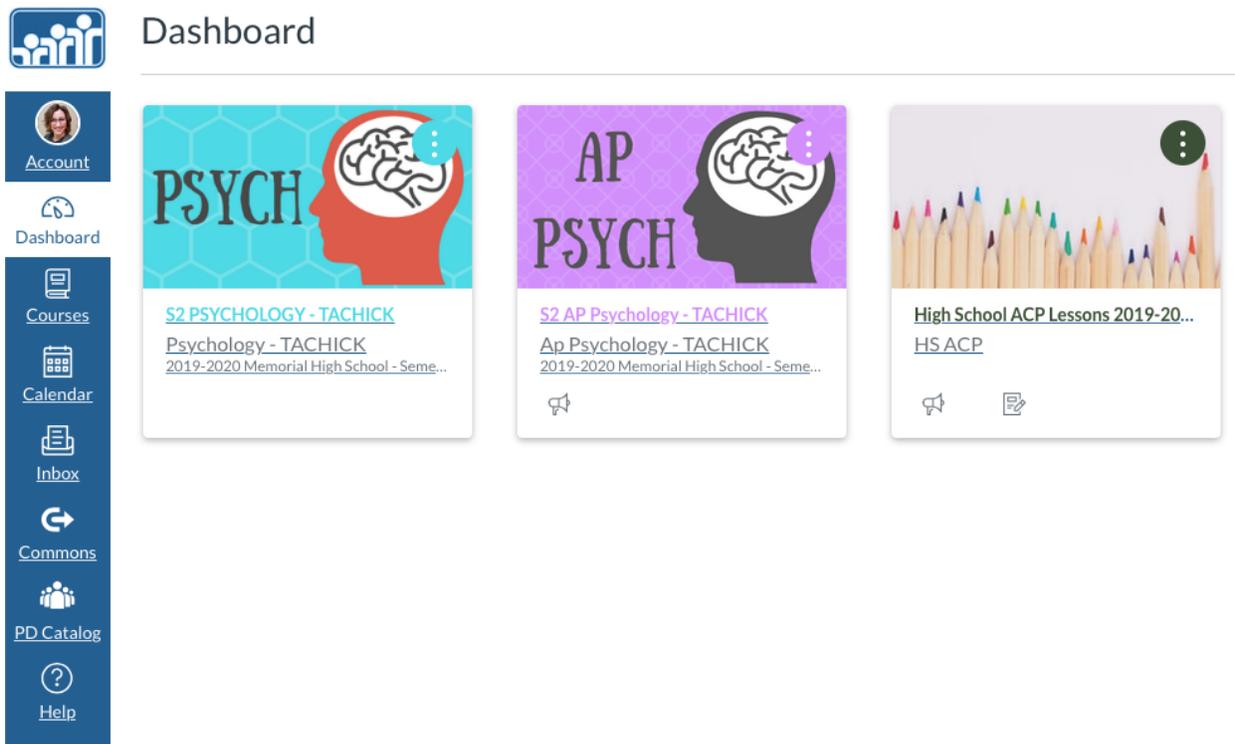

If you need to join our class **Remind**, you can do so with this link via the free, downloadable smart phone app: remind.com/join/jtach or you can follow the step-by-step instructions provided here.

STEP-BY-STEP INSTRUCTIONS FOR ACCESSING REMOTE LEARNING RESOURCES ON CANVAS:

Go to https://ecasd.instructure.com to log-in to your ECASD Canvas account.
- **Username:** student ID number (first part of ECASD email address)
- **Password:** same password you use to log-in to school computers, access school email, etc.

Choose the AP Psychology course from the Dashboard. If you do not see AP Psychology listed, select the "Courses" tab from the left-hand menu, choose "All Courses" and find "S2 AP Psychology—TACHICK" in the list. Click on the little star to the left of the course name to turn it orange, which will add it to your Dashboard. When you return to your Dashboard, you should see the AP Psych course present.

From the AP Psychology course homepage, click on the "COVID-19 School Closure Remote Learning Resources" button. This will take you to the module I've set up to keep students connected and engaged in their academic learning while we're out. Depending on the week, students can access topic-based learning resources like notes, video lessons, interactive simulations, and supplemental articles. They will also have opportunities to assess for understanding and participate in discussions. I will continue to update these resources on a regular basis for the duration of the closure or until receiving different guidance from district leadership regarding remote instruction and assessment.

Motivation Theories Learning Resources

TASK:

Utilize the following resources to familiarize yourself with the various motivation theories and meet the learning targets listed below before completing the Motivation Theories-Check Your Understanding assessment. You will need to take your own notes to aid your understanding (in addition to using the ones I've provided for you below).

Motivation Theories Learning Targets:

1. Identify and apply basic motivational concepts to understand the behavior of humans and other animals.
2. Compare and contrast motivational theories, including the strengths and weaknesses of each.
3. Discuss the biological underpinnings of motivation, including needs, drives, and homeostasis.

Motivation Theories Essential Vocabulary:

• motive	• homeostasis	• intrinsic motivation
• physiological need	• instinct theory	• extrinsic motivation
• psychological need	• fixed action pattern	• optimal arousal theory
• drive	• species specific behavior	• Yerkes-Dodson Law
• incentive	• drive-reduction theory	• flow

Motivation Theories Notes

Please download and print these Motivation Theories Notes, if resources allow. Otherwise, you can open and use this electronic file to supplement your own note-taking.

Motivation Theories Video Lessons

Please view the following videos to learn about common Motivation Theories. Take your own notes to aid memory and deep processing as needed.

1) Crash Course Psychology Summary of Motivation Theories

If students need to take formative assessments or participate in discussions while we're apart, they can access these directly from the remote learning resources module, or they can find them posted under the "Quizzes" and "Discussions" tabs in the left-hand menu respectively. The discussion tab will be visible for students once I create their first discussion post.
