

Dear Parent/Guardian,

NorthLakes Community clinic is offering a preventative school based dental program for all children grades Pre-K through 8th. This program is funded in part by Wisconsin Seal-A-Smile in collaboration of the Children's Health Alliance of Wisconsin and the Division of Public Oral Health Program. A dental professional will come to the school to provide dental services at NO CHARGE to you. The treatment which your child will receive in this program is not meant to be an alternative to regular dental care. It is strongly recommended that you continue routine care with your family dentist. If you do not have a family dentist for routine dental care including any follow up care which may be recommended after your child has completed this school based oral health program, we are committed to helping you find one.

This program will include:

- ✓ Oral health education and dental supplies
- ✓ Oral health assessment by a licensed dental professional
- ✓ Fluoride varnish applications (2-3 per year)
- ✓ Dental sealants and sealant replacement where needed

If you would like to have your child participate in this program, you will receive a report describing your child's dental health status and what was completed at each visit. This report will be shared with your dentist and the school nurse. All procedures will follow recommendations from the American Dental Association and Center for Disease Control and Prevention for school-based dental programs. We are committed to following these recommendations as they change with the pandemic.

Permission slips, that need to be returned to the school, will be available during back-to-school events or sign up online at:

[Seal a Smile - Wisconsin](#)

Once you have completed the Online Consent, it will automatically send it to our Superior Smiles Coordinator.
