

# THE RUBIK'S

# CUBE

## PART 5

By Ms. Nanci

Here we go  
again...

One face, one layer.  
It IS easier the  
second time around...

Second layer  
done!

Yellow face!

A hand is holding a Rubik's cube in the foreground, partially obscuring the keyboard of a black HP laptop. The laptop screen is visible in the background, showing a Windows operating system interface. The scene is set on a light-colored, patterned fabric surface. The text is overlaid on the laptop keyboard area.

Here's where I  
messed up  
before. I've got to  
concentrate!

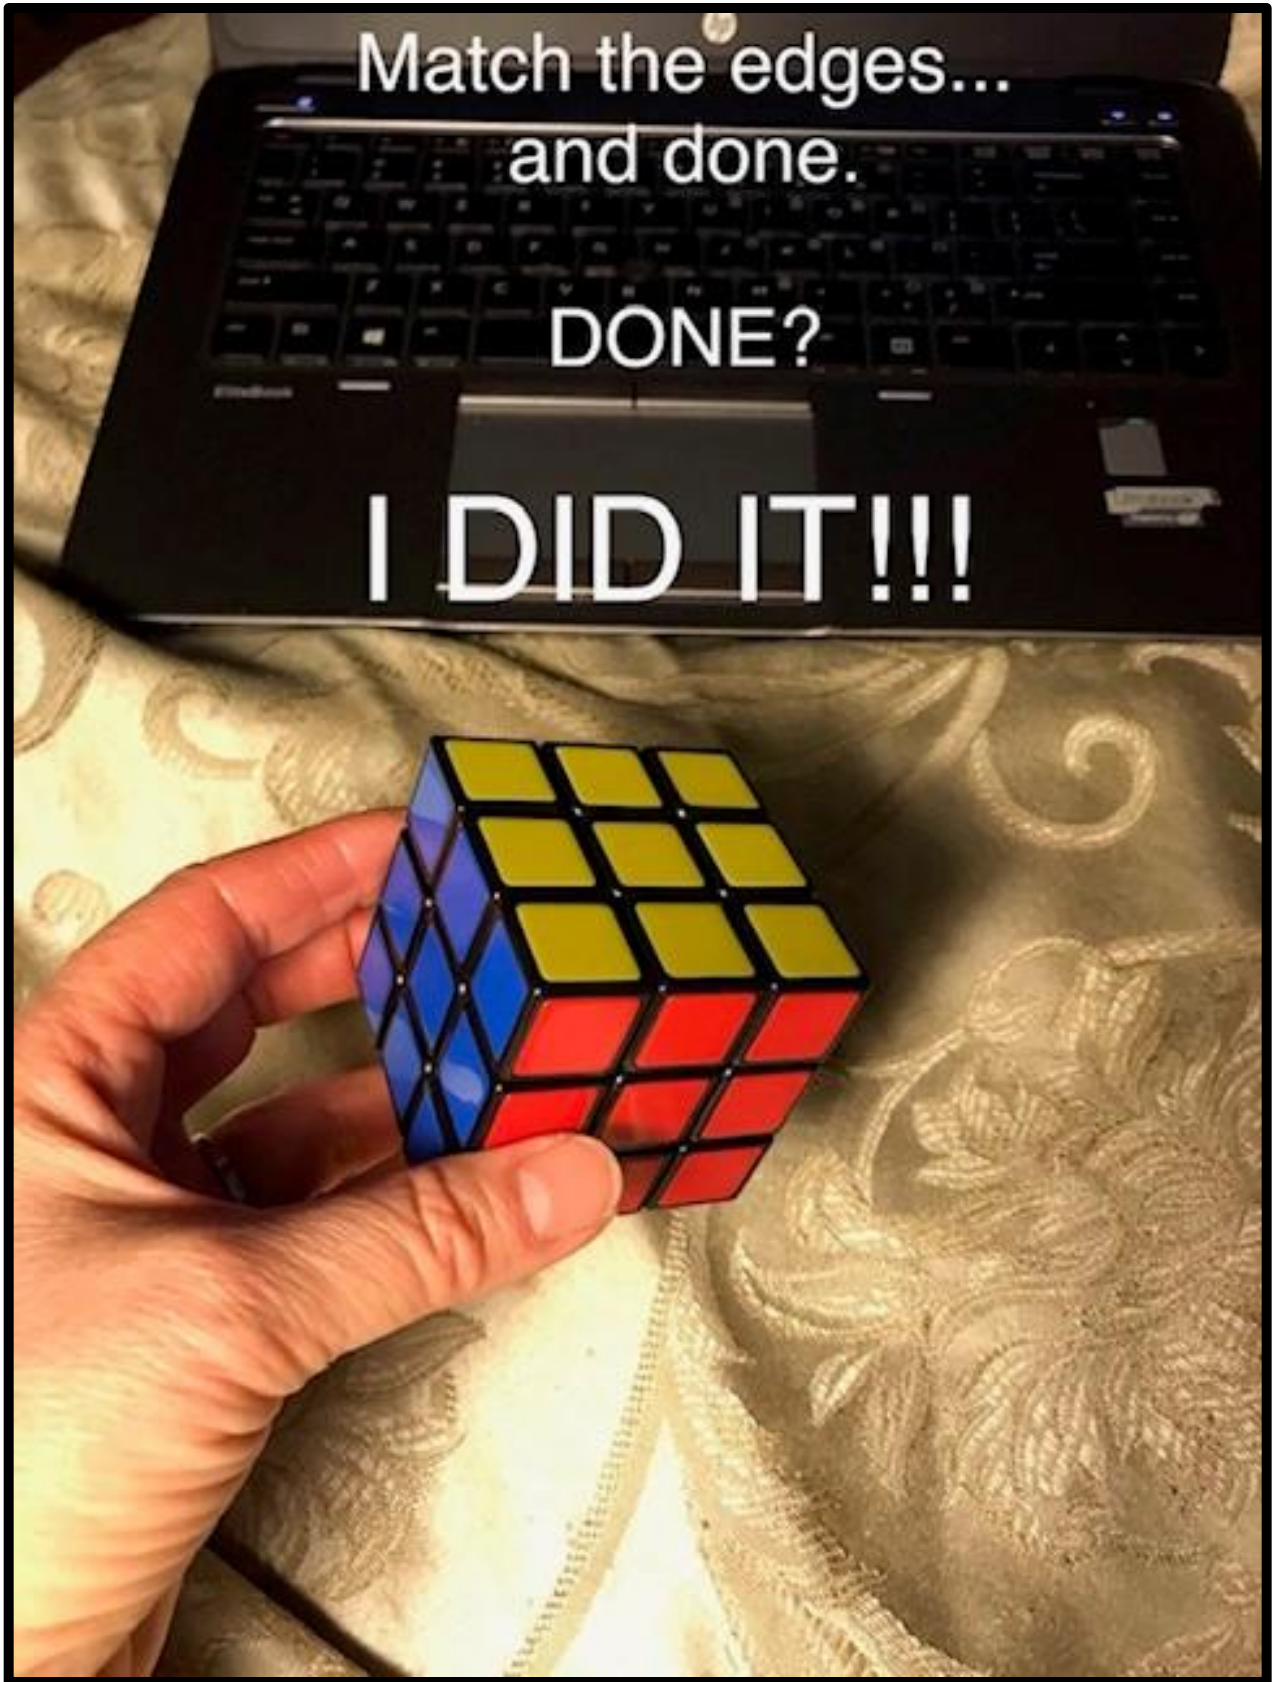

Match the  
middles...

Match the edges...  
and done.

DONE?

I DID IT!!!

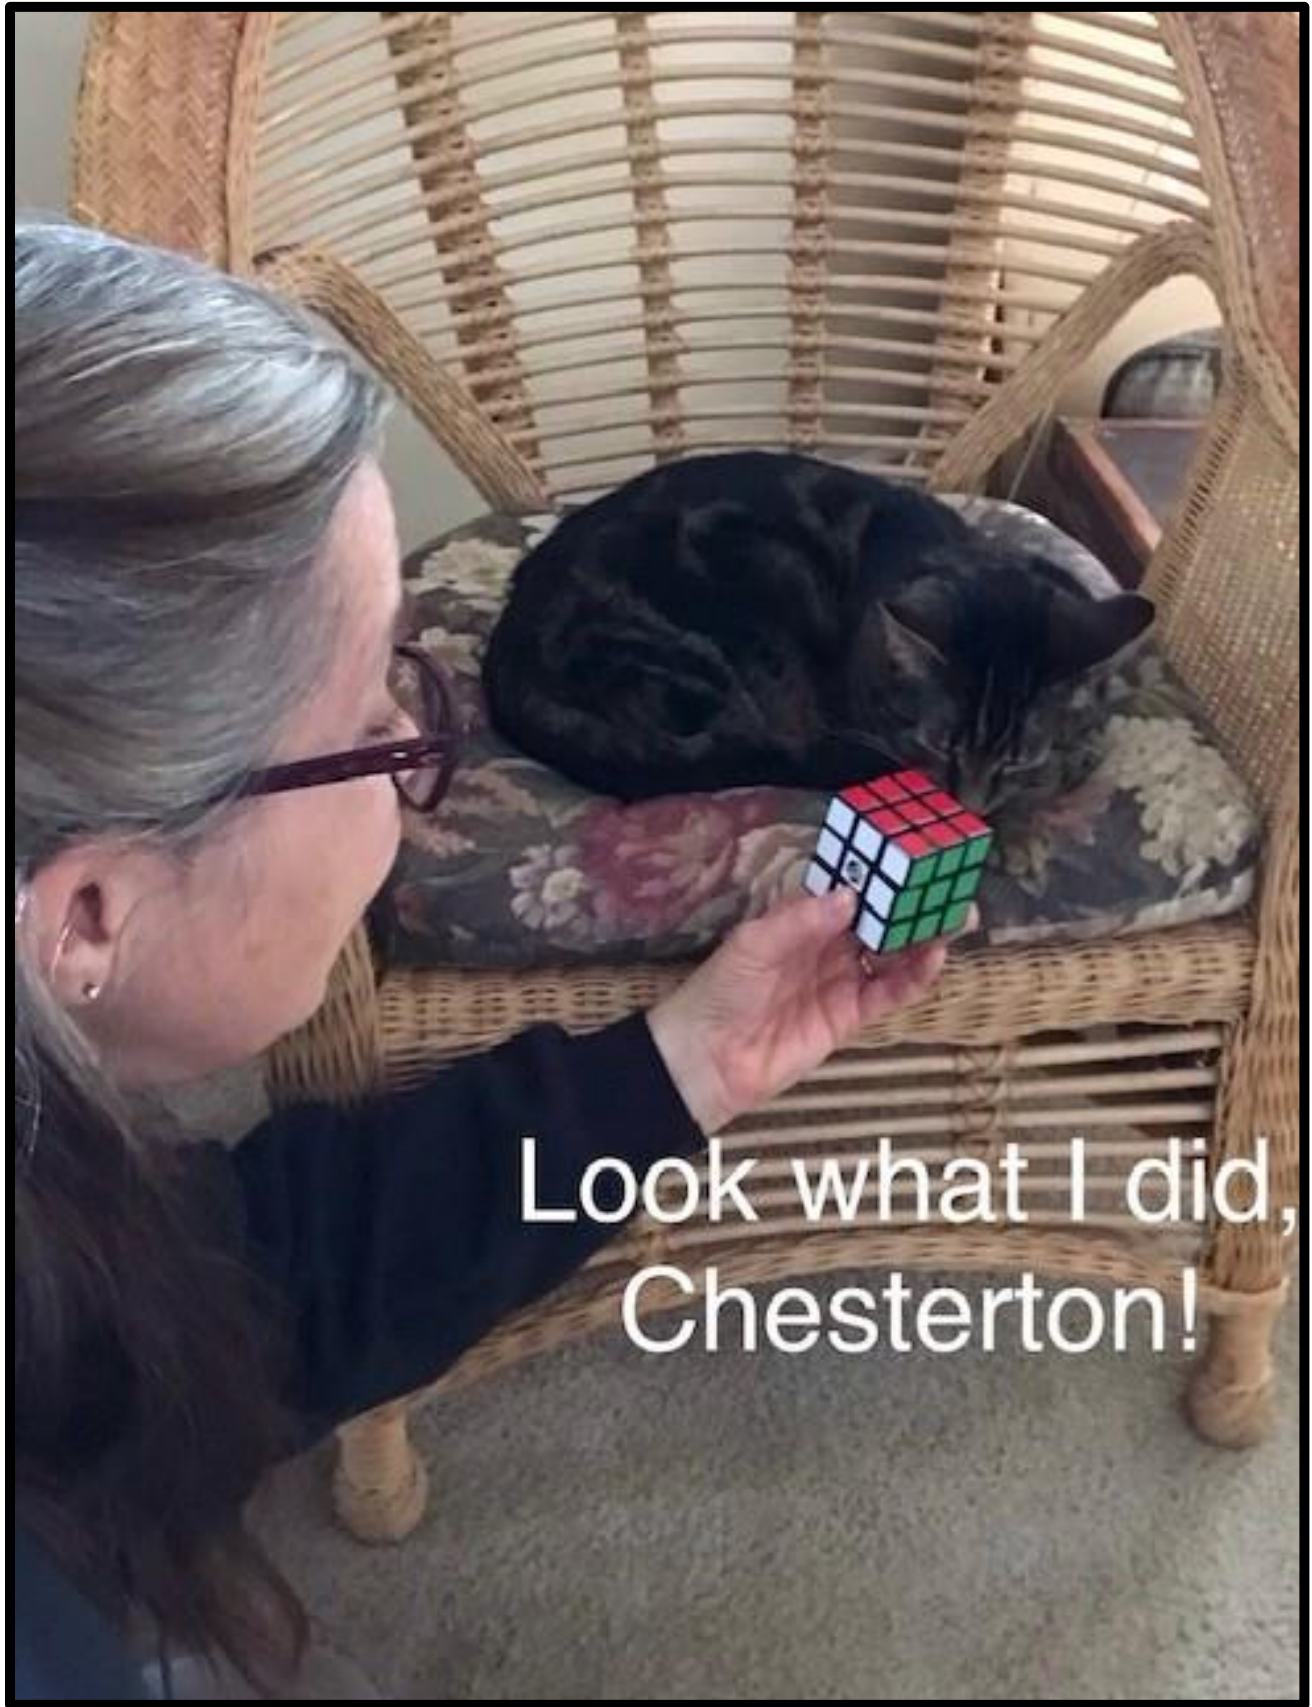

I look, world!  
I did it!

I solved the  
Rubik's Cube!

I wish I could  
show the  
MCE!

Look what I did,  
Chesterton!

I solved it,  
Hyperion!

Hey, fish!  
I did it!

I'd better not disturb them.  
They're still in school.

Lucky fish!

Look, Apollo! I  
solved it!

Oh, don't be mad...  
I'd let you try it if  
you had thumbs.

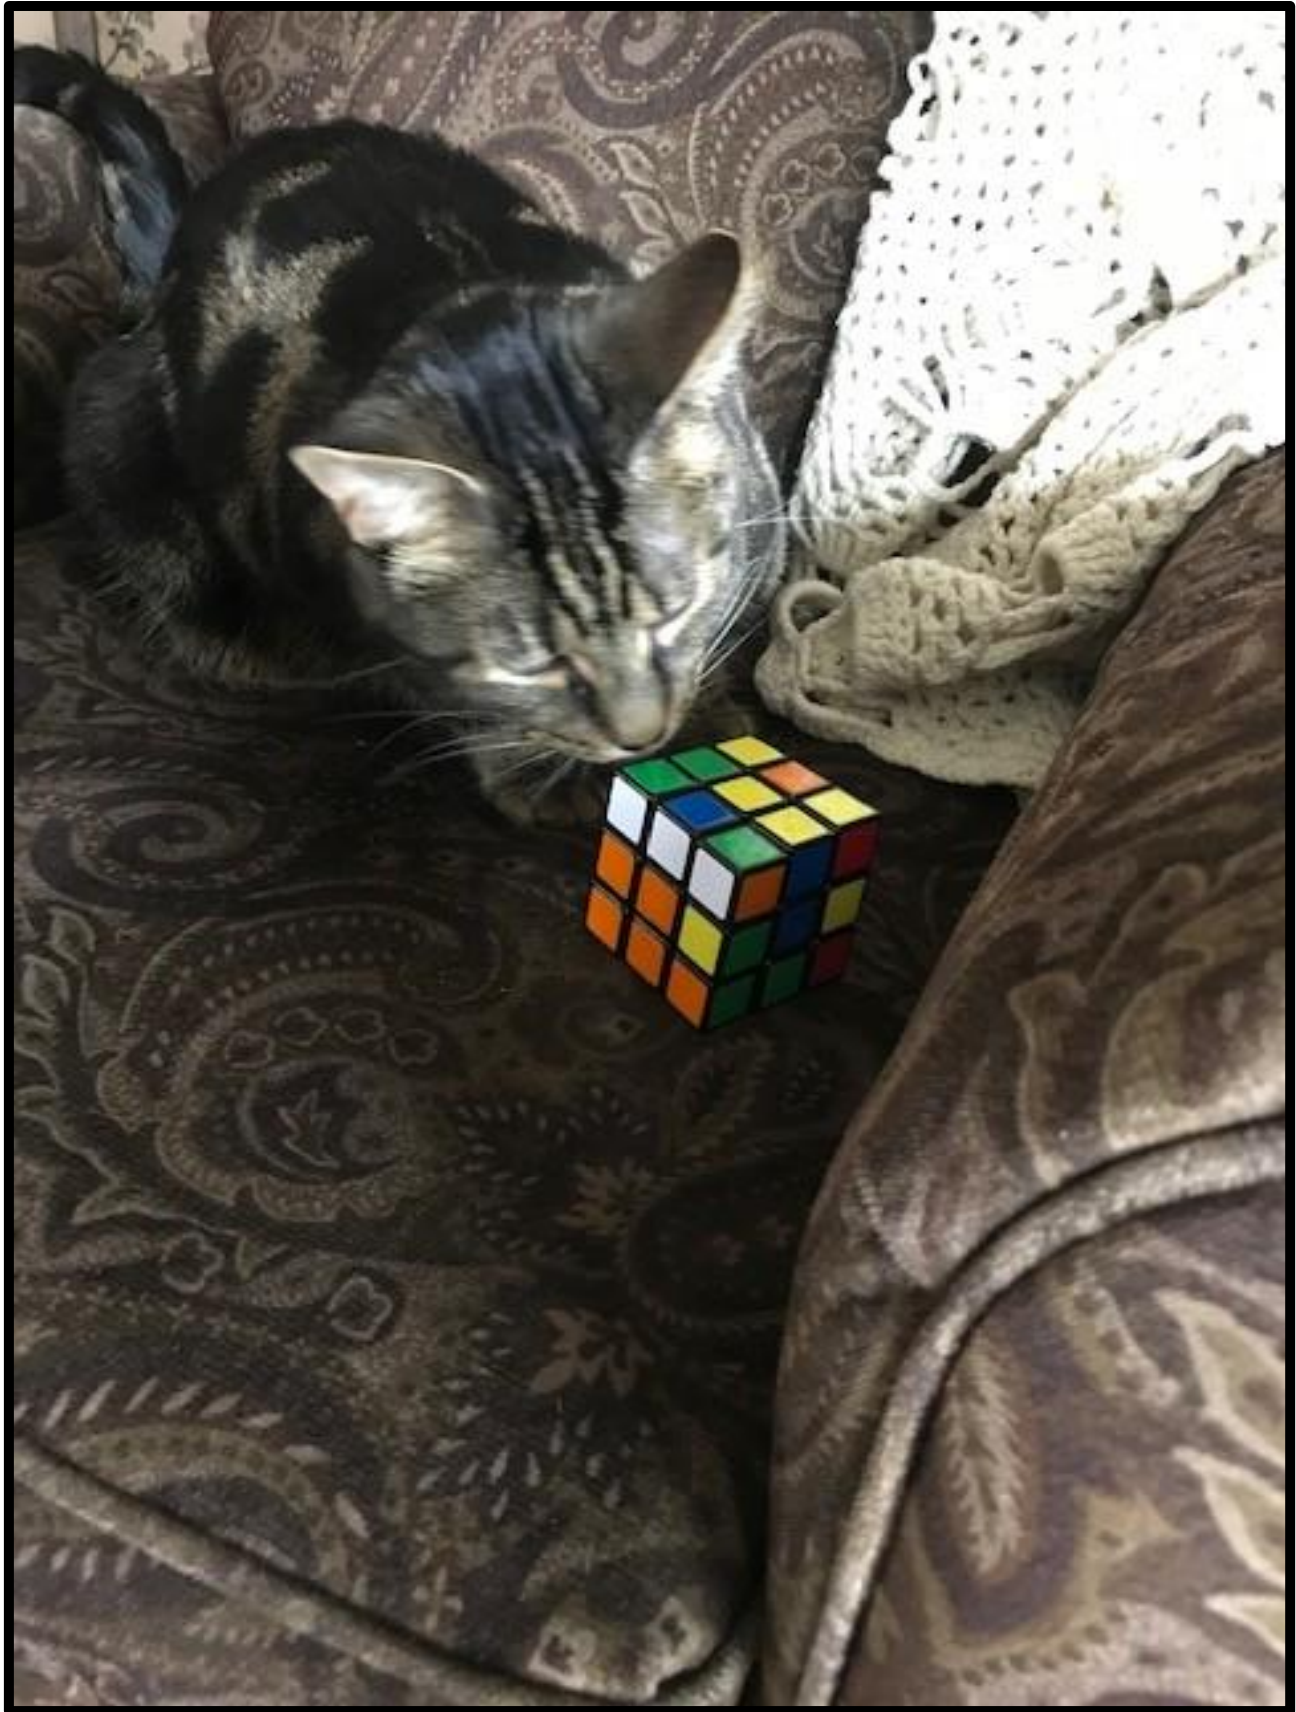

This time I'm  
putting it out of  
Apollo's reach!

Chesterton!  
What have  
you done?!

This will probably  
take a while...

But I WILL  
solve it again.

See? I'm making progress...

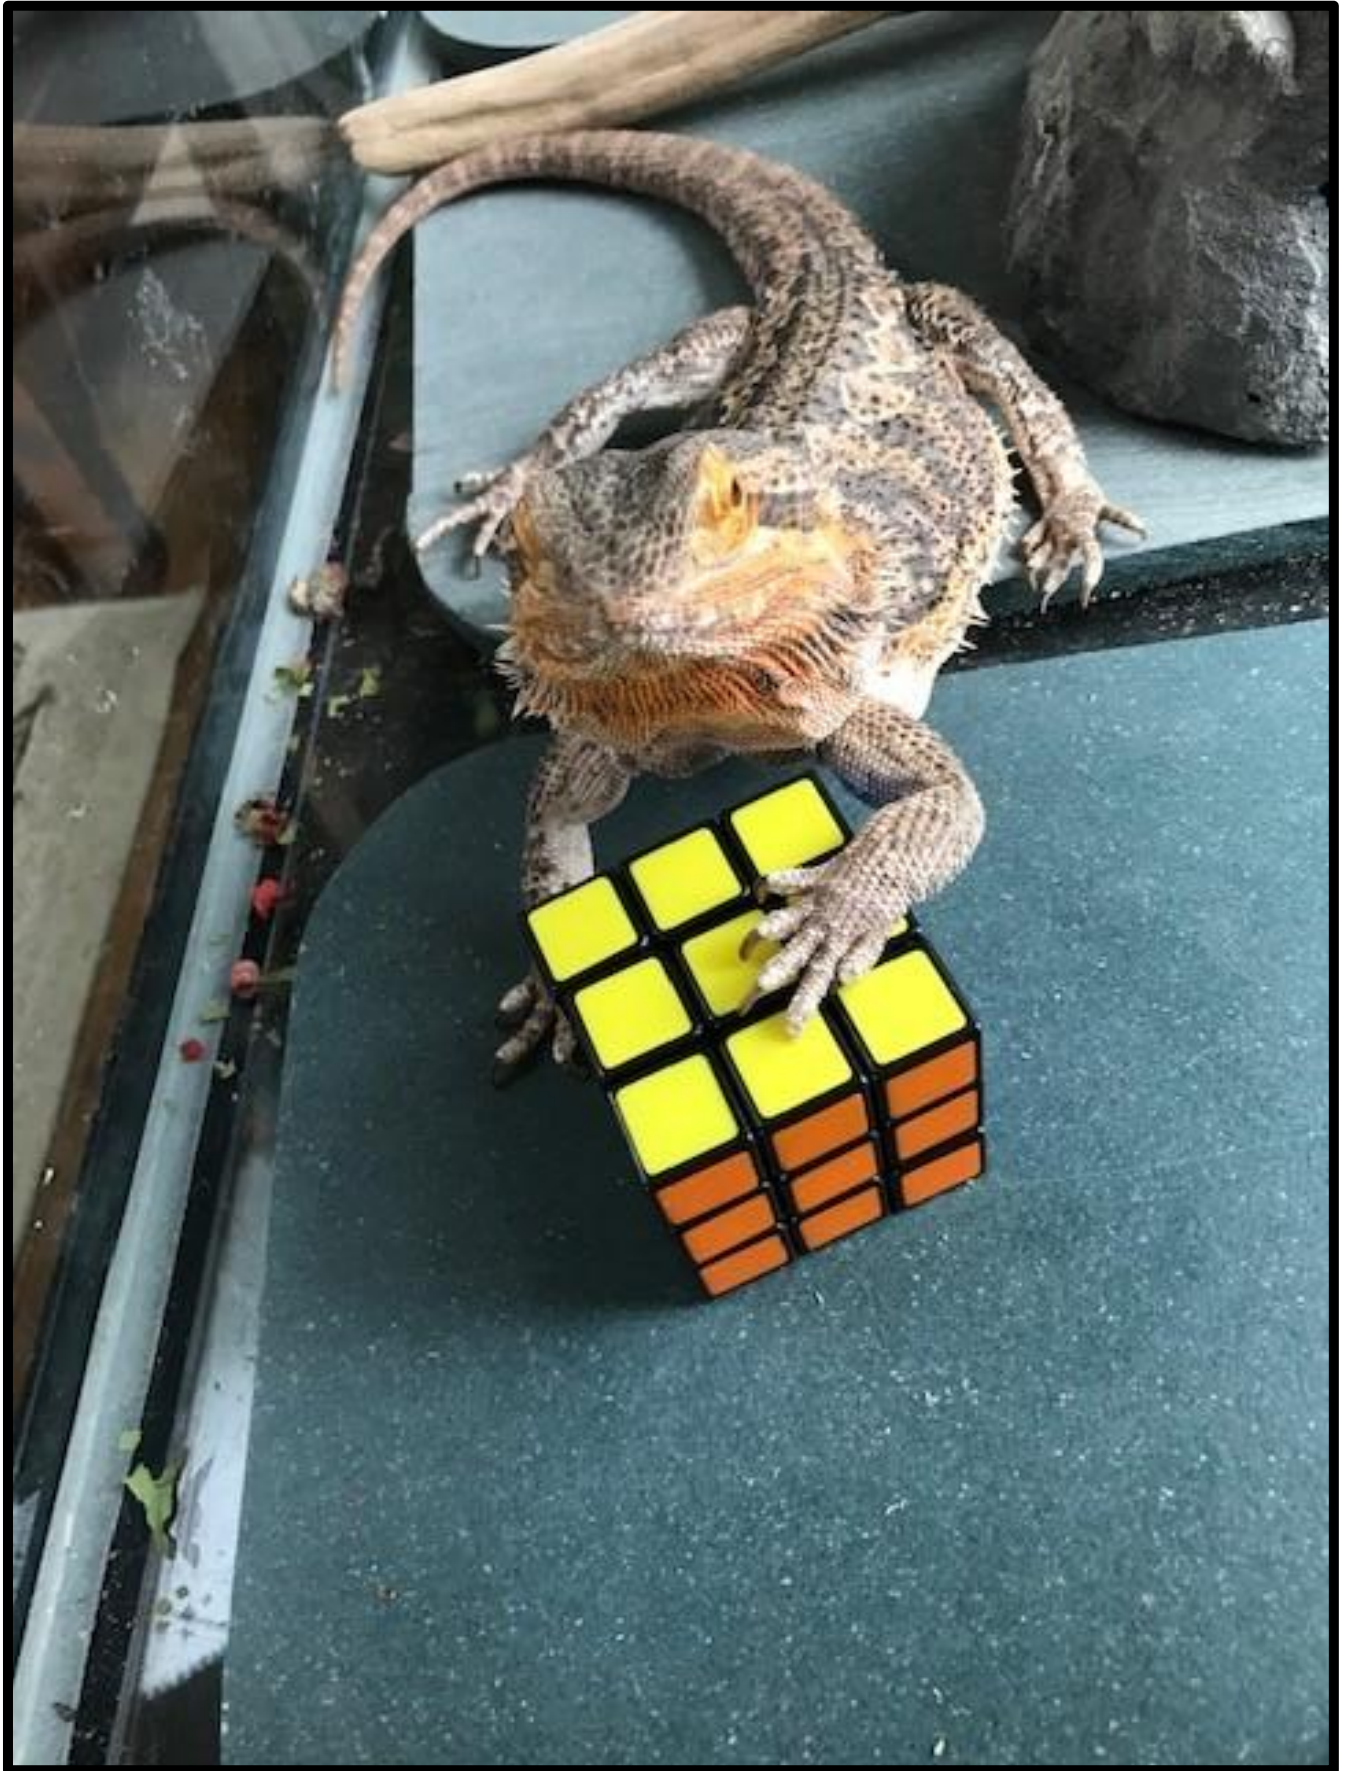

Ha, ha! Solve  
#2!

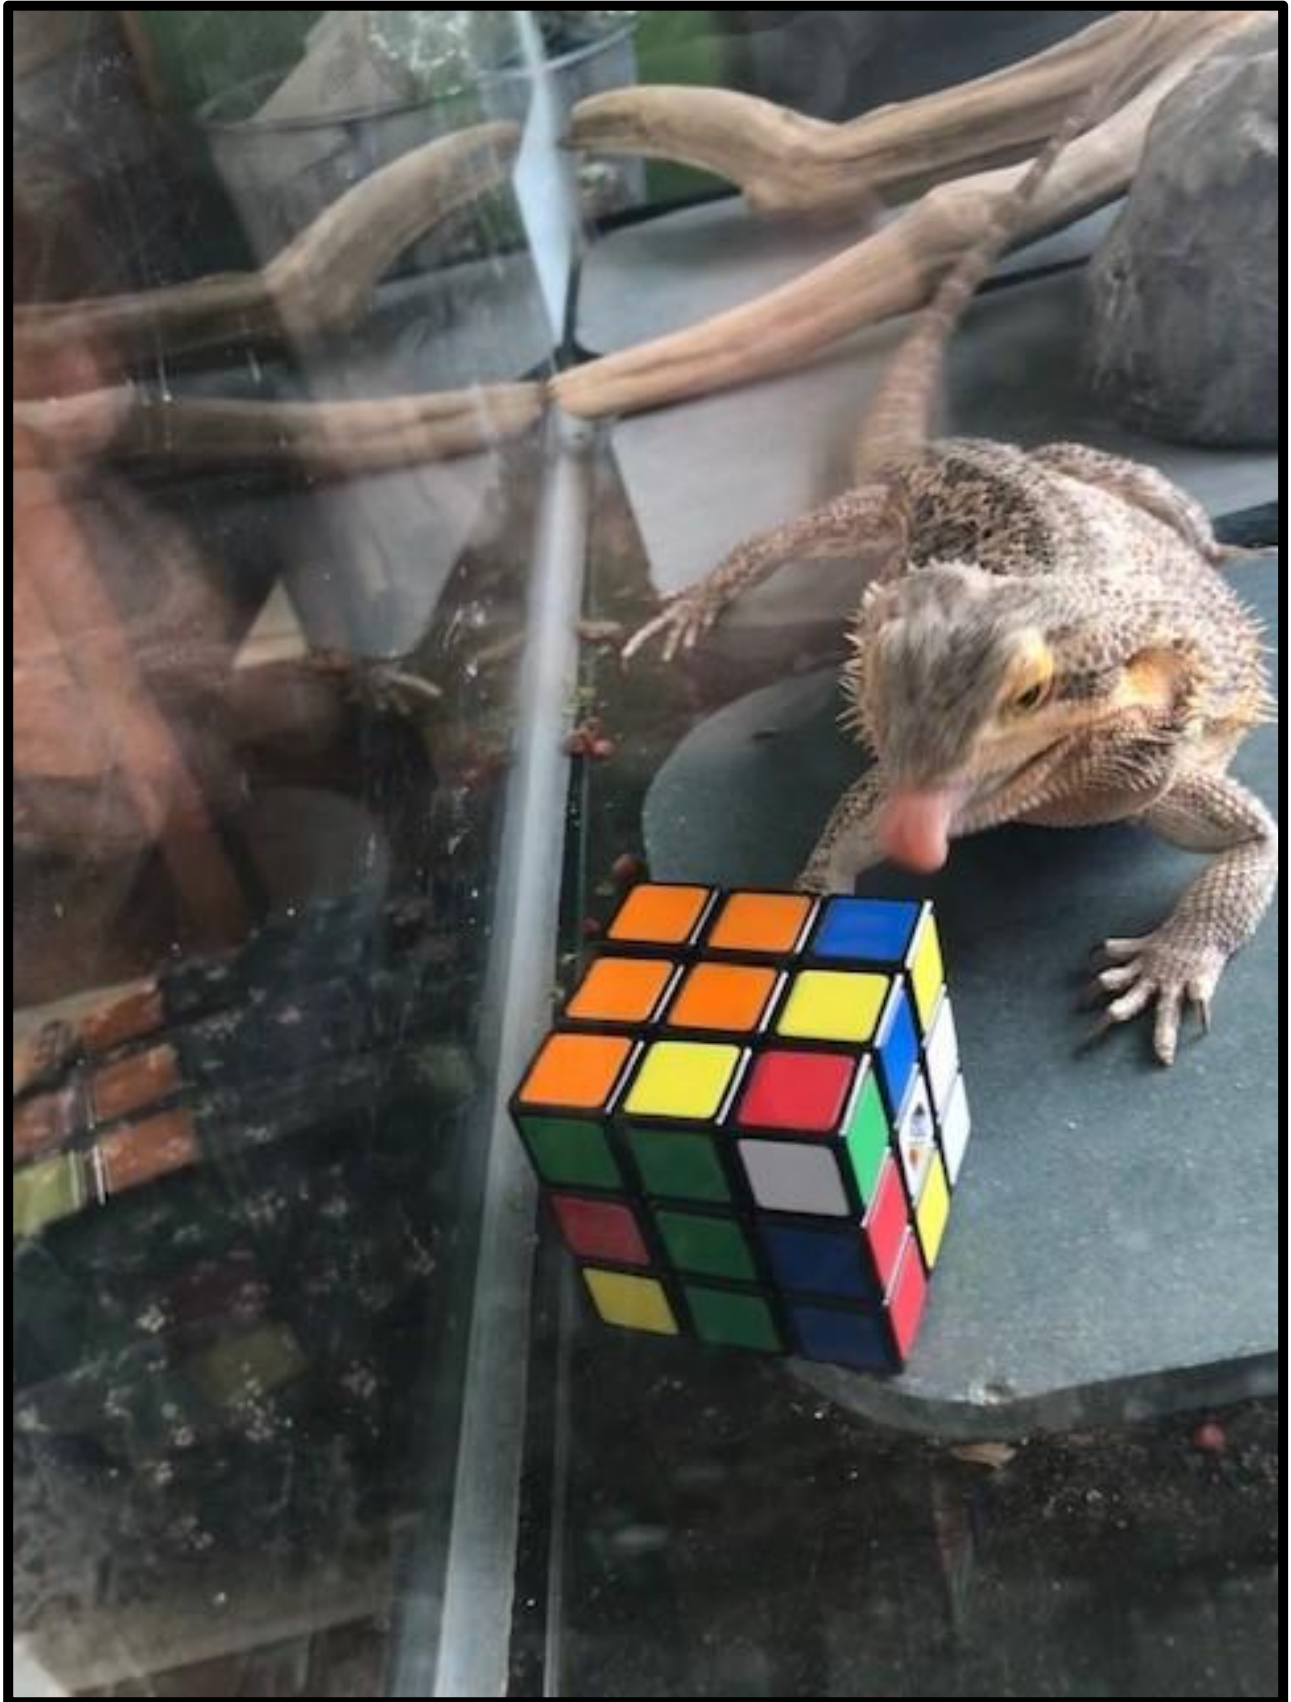

I guess I need to put it  
out of Apollo and  
Chesterton's reaches.

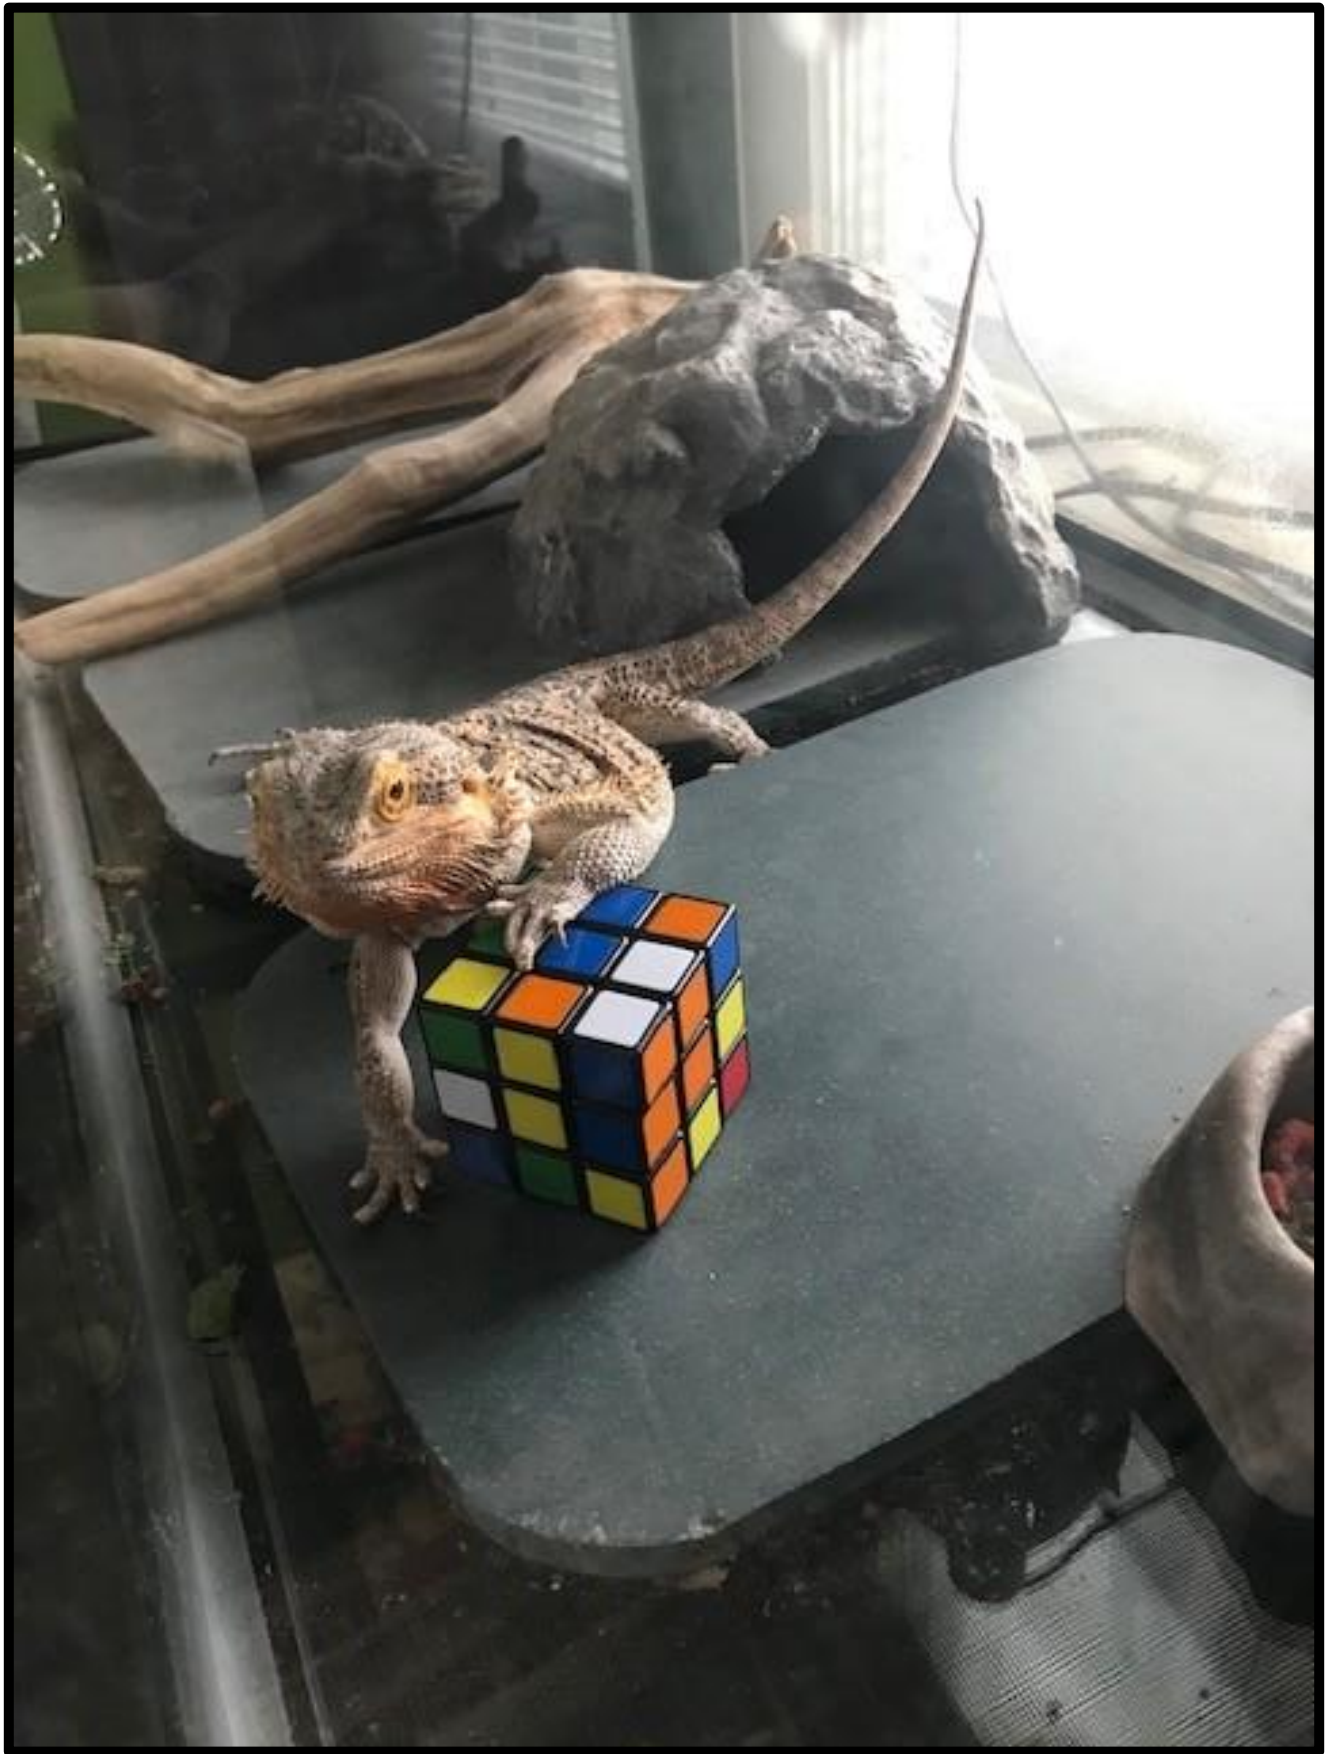

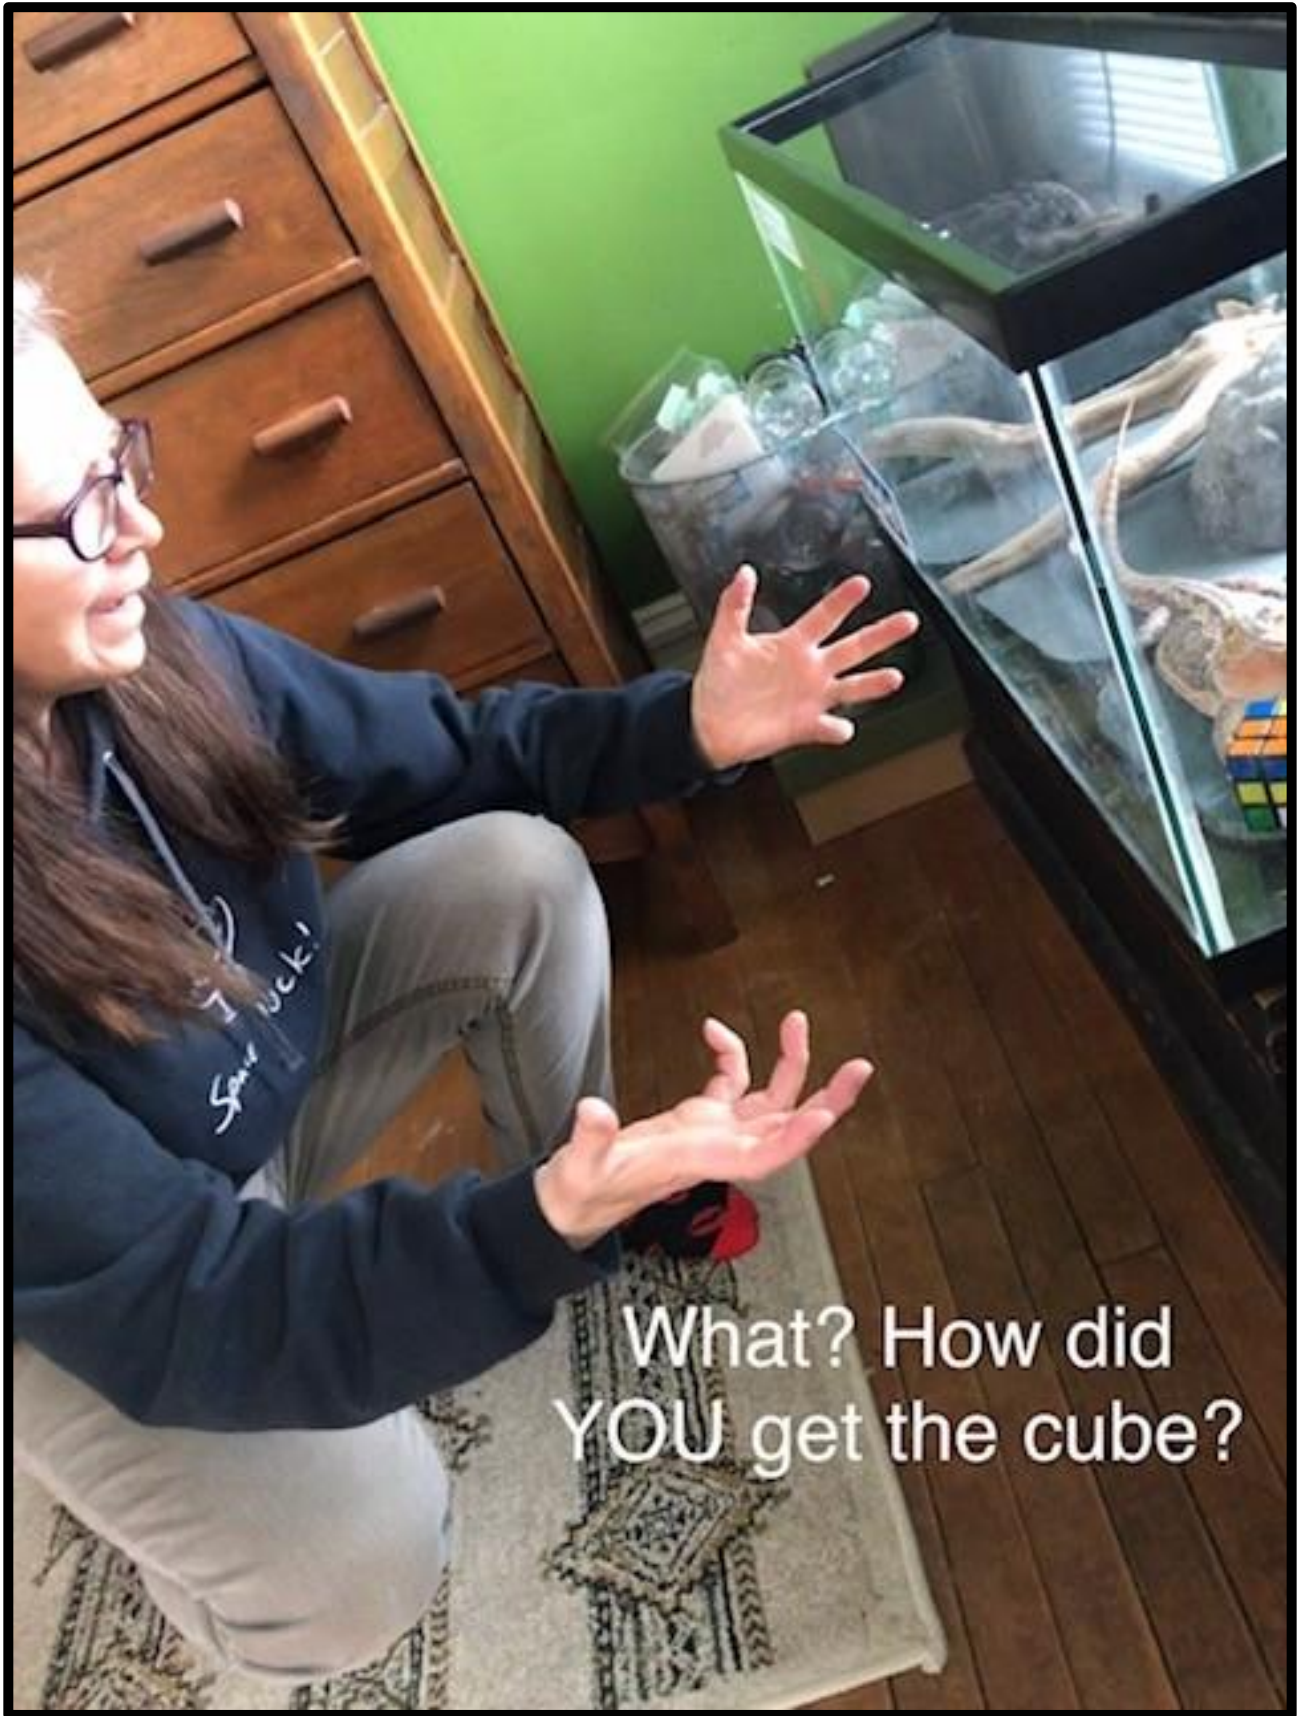

That should  
do it!

What? How did  
YOU get the cube?

I'm getting  
faster!

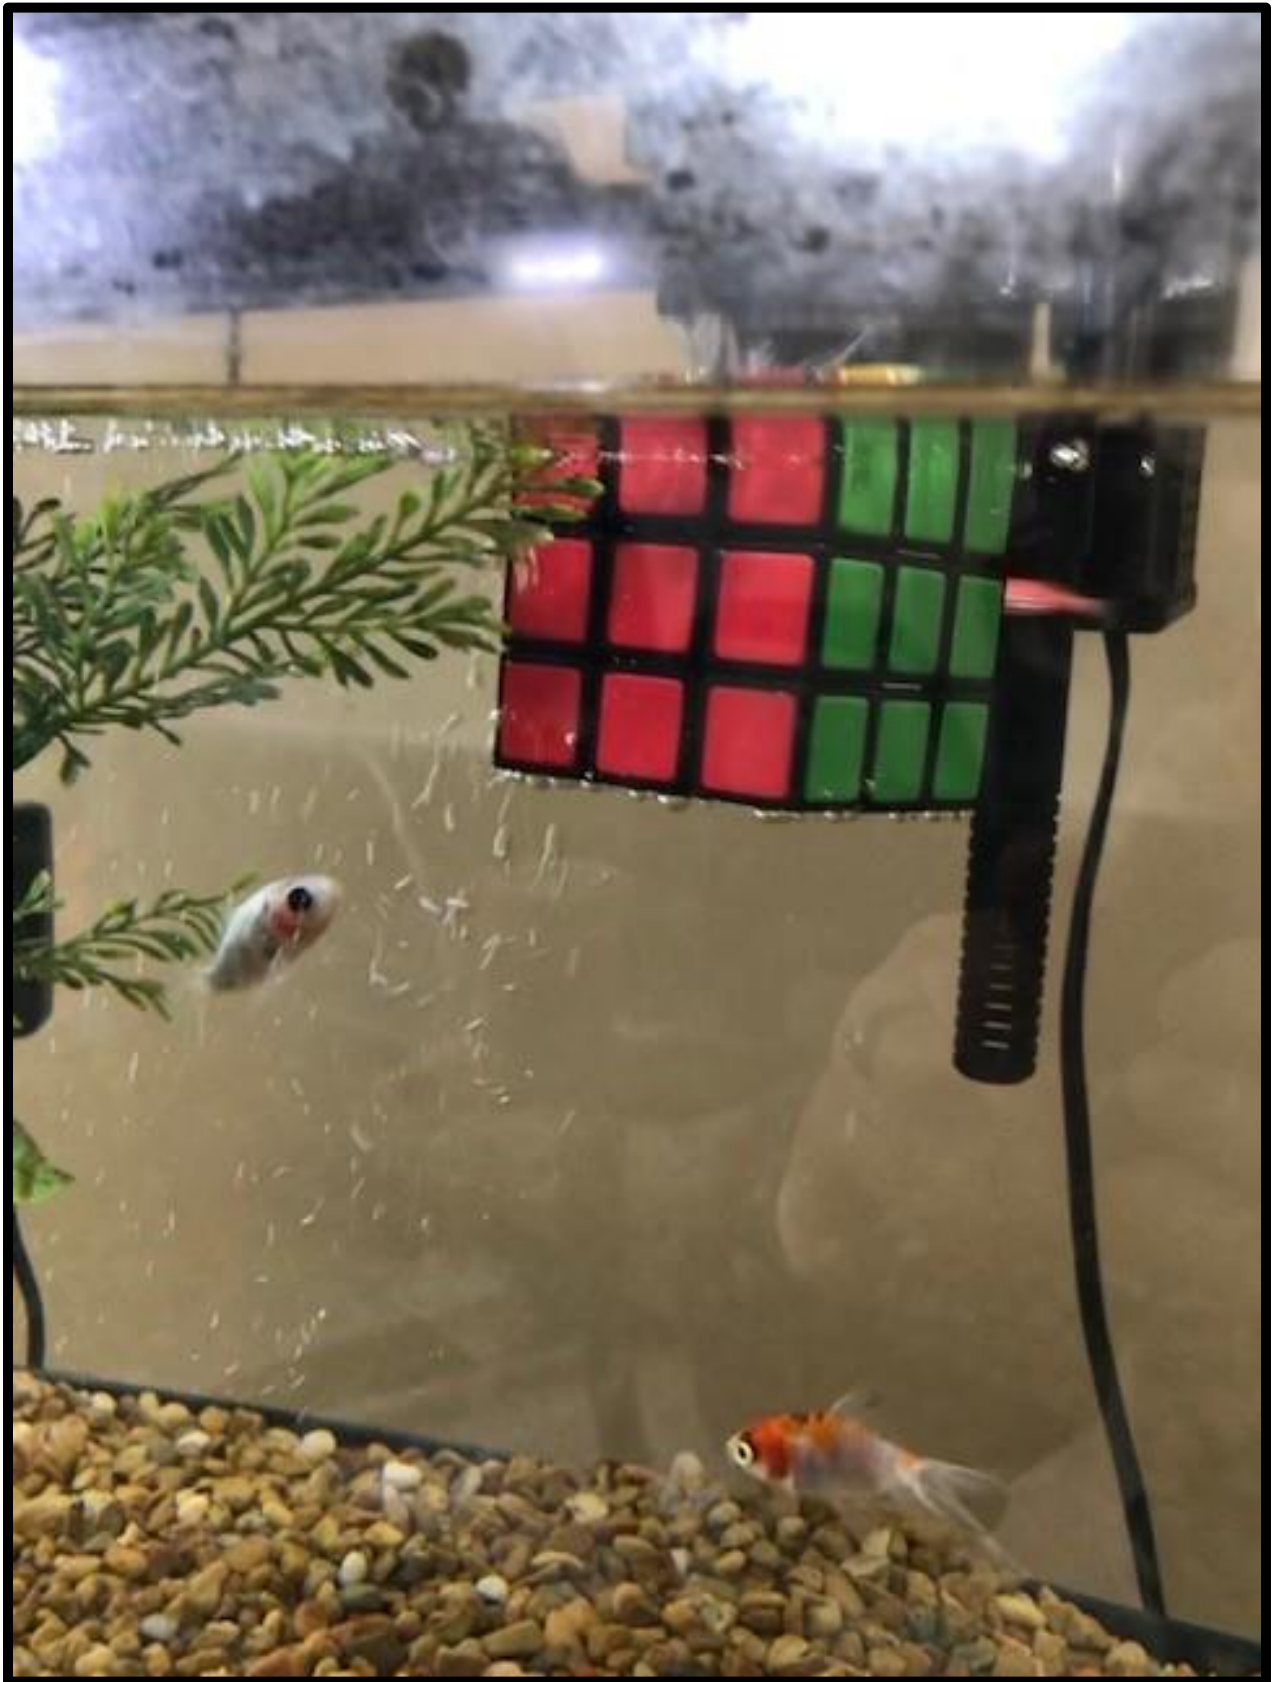

This should keep  
it safe from  
Apollo and  
Chesterton AND  
Hyperion!

**THE END...?**
