Job Summary

The Technology Coordinator – Specialized acts as a technology integration architect and project manager as directed by a Director of Special Education. This position provides leadership throughout the District for a wide range of technology related initiatives, with an emphasis on specialized and assistive technology. This position develops, leads, and facilitates District technology staff development, in-service and training, as well as manages and implements complex technology related projects which support the Districts’ goal and priorities.

Essential Job Functions

- Support the successful pursuit of the District Strategic Plan and priorities as well as School Improvement Plans by defining, delivering, and supporting the implementation of information, instructional and assistive technologies.
- Leads the District's instructional technology systems management and integration in several of the following areas; including but not limited to:
 - Specialized and assistive technology including Augmentative or Alternative Communication (AAC) systems which includes:
 - Interpreting, integrating, and synthesizing evaluative information to make recommendations for assistive technology interventions and services for the purpose of providing access for students.
 - Researching and developing solutions from existing and emerging instructional technologies to support Tier II and Tier III interventions.
 - Assisting in and leading professional development and training which supports the integration of assistive technology and accessibility tools the Equitable Multi Level System of Supports.
 - Assessing and recommending selection, modification and implementation of assistive technology devices, products, and services.
 - Coaches staff in the implementation of assistive technologies to enhance student success in their Least Restrictive Environment (LRE).
 - Learning Management Systems (LMS)
 - Software license assignment for staff and students
 - Support the curriculum through the integration of educational technology resources

- Technology based collaboration systems like Microsoft SharePoint and Teams
- Instructional Technology Leadership Team (ITLT)
- Software review and adoption process
- Participate in committee activities and collaborate with others on system development, integration, and implementation of interfaces with other training and technology related systems.
- Innovate by partnering with staff, identifying specific needs and developing unique and sustainable solutions.
- Form interdependent teams focused on a common purpose, mutual accountability, and outstanding results.
- Develop strong interpersonal relationships with our staff so that they are willing to utilize technology and the solutions that you offer to reach beyond their comfort zone.
- Keep stakeholders informed and gather critical feedback to improve processes and relationships.
- Work collaboratively with district staff and vendors to create solutions that support the District while developing positive relationships with high quality vendors.
- Maintain professional and technical knowledge by attending educational workshops, reviewing professional publications, establishing personal networks, benchmarking state-of-the-art practices, and participating in professional societies.

Ancillary Job Functions

- Participate in budget development and management at the request of a Director of Special Education.
- Participates in grant writing activities upon request from a Director of Special Education
- Performs other related duties as assigned.

Required Qualifications – Required qualifications to effectively perform the job at the time of hire. An equivalent combination of education, training, and experience will be considered. Additional requirements and/or substitutions may be requested and require the approval of HR.

- Bachelor’s Degree with experience in Pre-K-12 instructional programs.
- Three years or more of experience working directly with students in special education.
- Five years or more of experience in instructional integration of technology, educational leadership, and professional development.
- Experience with Learning Management Systems, (LMS) and utilizing LMS to increase student engagement, effectiveness of assessment, and improved individualization of instruction.
- Experience with managing, configuring, and maintaining instructional technology systems and tools.

Preferred Qualifications – Highly desired education, training, and/or experience that may be helpful in performing the job, if applicable.

- Wisconsin certification in special education (teaching or related services).
